Application/Control Number: 10/708,067

Art Unit: 2818

This application contains claims directed to the following patentably distinct species of the claimed invention:

Group I: Claims 1-3: direct to a semiconductor substrate jig wherein the substrate jig comprises increasing or decreasing volume while deforming a shape of an expandable member by being supplied with fluid.

Group II: Claim 4: directs to a semiconductor substrate jig having a frame, annular members that constructed so as to be individually movable in a direction perpendicular to semiconductor substrate.

Group III: Claim 5: directs to a semiconductor substrate jig wherein the substrate jig comprises a frame, a porous member, a vacuum hole for applying negative pressure to the porous member.

Group IV: Claim 6: directs to a semiconductor substrate jig comprises a first jig having a first suction mechanism sucking the substrate, a second jig having a second suction mechanism sucking the substrate.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim

Application/Control Number: 10/708,067

Art Unit: 2818

is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Thao P. Le whose telephone number is 571-272-1785. The examiner can normally be reached on M-T (7-6).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, David Nelms can be reached on 571-272-1787. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
